

NEVER FORGET ANOTHER DOSE WITH HEALTHHUB

HealthHub Medication List

Did you know that you can access Prescription Records from the past 12 months, manage your medication list, and set reminders to take your medications on time?

- Indicate if you have taken your medications and see if any doses were missed over the last 7 days.

- Set a daily schedule so that a notification will be sent when it is time to take your medications!

- Your medication-related needs may be found under this tab in the HealthHub app.

- Take a photo of the medication and write the medication name.

- Add the way to use the medication.

- Add the dose and the dose units to be taken, as well as the number of times it should be taken in a day.

- Type what the medication is used for.

- Add in any other instructions as well as how the medication should be taken with regards to meals.

- Your completed electronic medication list will look like this!
